

Replit Prompt for IPM AI Chatbot (Corrected)

Copy and paste this entire prompt into Replit when creating your new app:

Build a professional AI chatbot API for International Property Management (IPM), a USA-based international property management and real estate company. This chatbot will be integrated into their website to assist visitors with property inquiries, investment guidance, and lead generation.

Company Background:

IPM (International Property Management) is a USA-based company specializing in international vacation rental management and real estate sales, with primary focus on premium Mexican destinations including:

- Riviera Maya region (Playa del Carmen, Tulum, Cancun)
- Puerto Vallarta
- Other premium Mexican resort destinations
- Select USA markets (Lake Norman, North Carolina, Miami, Florida)

Key Statistics:

- 10+ years of international property management experience
- 30+ properties under management across Mexico and USA
- 75-85% average occupancy rates year-round
- 8-12% annual ROI for international investors
- Specializes in large family properties and waterfront locations
- Expert in cross-border real estate investment and management

Technical Requirements:

Framework: Python + Flask

- RESTful API with CORS enabled
- JSON responses

- Error handling and logging
- Environment variable configuration

AI Integration:

- OpenAI GPT integration for intelligent responses
- Custom knowledge base with IPM-specific information
- Context-aware conversations
- Lead qualification capabilities

API Endpoints Needed:

1. `/api/chat` - Main chat endpoint
2. `/api/properties` - Property search and information
3. `/api/leads` - Lead capture and qualification
4. `/health` - Health check endpoint

Core Features:

1. International Property Search & Information

- Search properties by location, price, type across Mexico and USA
- Provide detailed property information and market analysis
- Compare different international markets and opportunities
- Cross-border investment potential analysis

2. International Investment Guidance

- ROI calculations for international properties
- Cross-border financing options (US banks, developer financing, international loans)
- Currency considerations and exchange rate impacts
- International market insights and trends
- Risk assessment for foreign property investment

3. Mexico Real Estate Expertise (for US/Canadian Investors)

- Legal requirements for US/Canadian buyers in Mexico (fideicomiso system)

- Tax implications for US and Canadian investors
- Best Mexican locations for different investment goals
- Cultural and operational considerations for international investors

4. IPM International Services

- Cross-border property management expertise
- International rental income optimization
- Multi-platform marketing (Airbnb, Booking.com, Expedia globally)
- Currency management and international banking
- Legal compliance across jurisdictions
- Success stories from international investors

5. Lead Qualification & Capture

- Budget assessment (\$200K-\$400K, \$400K-\$600K, \$600K-\$1M, \$1M+)
- International investment experience and goals
- Location preferences (Mexico vs USA markets)
- Citizenship/residency status for legal guidance
- Contact information collection and consultation scheduling

IPM International Services:

- Cross-border property management with 75-85% occupancy rates
- International revenue optimization and dynamic pricing
- 24/7 multilingual guest support and maintenance
- Global marketing across international booking platforms
- Multi-currency financial reporting and international wire transfers
- Legal compliance across US and Mexican jurisdictions
- Tax optimization for international property owners

International Investment Guidance:

- Cross-border financing: US bank international loans, developer financing in Mexico, currency hedging
- Legal structures: US LLC ownership, Mexican fideicomiso system, tax treaty benefits
- Tax considerations: US tax reporting on foreign rentals, Mexican withholding taxes, treaty benefits
- Best markets: Mexico for high yields, US for stability, diversification strategies

Conversation Examples:

International Property Search: User: "I'm a US citizen looking for beachfront investment properties" Bot: "Perfect! As a US-based company specializing in international property management, IPM can help you navigate cross-border real estate investment. For beachfront properties, our Mexican portfolio offers excellent opportunities like our Tulum Eco Resort Condos starting at \$285,000 with 12% ROI. We handle all the complexities of international ownership and management for US investors..."

Cross-Border Investment Guidance: User: "What are the tax implications of owning rental property in Mexico as a US citizen?" Bot: "Great question! As a US-based company with extensive experience in cross-border investments, IPM guides clients through all tax implications. US citizens must report Mexican rental income on their US tax returns, but can often credit Mexican taxes paid. Mexico typically withholds 25% on rental income, but this can be optimized through proper structure..."

Legal Questions: User: "How does the fideicomiso system work for US buyers?" Bot: "The fideicomiso is a secure, time-tested system that IPM has helped hundreds of US clients navigate successfully. As a Mexican bank trust, it gives you all ownership rights while the bank holds title as trustee. IPM works with trusted Mexican attorneys to ensure proper setup and ongoing compliance..."

Response Style:

- Professional, internationally-minded tone
- Emphasize IPM's USA-based expertise in international markets
- Highlight cross-border experience and cultural understanding
- Provide specific data and international market insights
- Always offer to connect with IPM's international team
- Address currency, legal, and cultural considerations
- Position IPM as the bridge between US investors and international opportunities

Lead Qualification Flow:

1. Determine citizenship/residency status (US, Canadian, other)
2. Assess international investment experience
3. Understand budget and financing preferences
4. Identify market preferences (Mexico, USA, diversification)
5. Determine investment timeline and goals
6. Capture contact information

7. Offer consultation with international investment specialists

Technical Implementation:

File Structure:

Plain Text

```
app.py                # Main Flask application
requirements.txt      # Dependencies
knowledge/
├── properties.json   # International property database
├── ipm_info.json     # Company information
├── markets.json      # Market analysis data
└── faq.json          # International investment FAQ
utils/
├── openai_client.py  # OpenAI integration
├── knowledge_base.py # Knowledge processing
├── currency_utils.py # Currency conversion

```

Environment Variables:

- OPENAI_API_KEY
- FLASK_ENV
- CORS_ORIGINS
- IPM_API_KEY (for website integration)
- CURRENCY_API_KEY (for real-time exchange rates)

CORS Configuration:

Enable CORS for these domains:

- <https://ipm.services>
- <https://djzrukff.manus.space>
- <http://localhost:3000> (for development)

Success Metrics:

- Accurate responses about international property investment
- Successful qualification of cross-border investment leads
- Natural conversation flow about complex international topics
- Proper handling of legal and tax questions
- Integration-ready API responses

Additional Features:

- Currency conversion capabilities
- International market comparison tools
- Legal requirement explanations by citizenship
- Tax treaty benefit calculations
- Time zone aware scheduling
- Multilingual support (English/Spanish)

Key Messaging Points:

- IPM is USA-based with international expertise
- Specializes in helping US/Canadian investors access international markets
- Provides full-service cross-border property management
- Handles all complexities of international real estate investment
- Proven track record with international investors
- Cultural bridge between US investors and international markets

Build this as a production-ready API that positions IPM as the premier USA-based international property management company, helping American and Canadian investors successfully navigate foreign real estate markets while maximizing returns and minimizing complexity.

After creating the app, also provide:

1. API documentation with international use cases
2. Integration code for the website chat widget

3. Testing instructions for cross-border scenarios

4. Deployment configuration

This chatbot should position IPM as the trusted USA-based expert for international real estate investment, particularly helping US and Canadian investors access high-yield Mexican markets while managing all cross-border complexities.
